

Programmawijzigingen 2022-2023

Program changes 2022-2023

Master Chemical and Materials Engineering

1st Master

Profile Process Technology

Year 1: compulsory courses (MA1)

Instrumentation for Process Technology has been removed. Students who still need to take this course must now enroll for **Sustainable Chemical Processes**

Is the new course not visible in the self-service or do you have any other questions regarding your study path? Please contact studypath.engineering@vub.be.

2nd Master

Profile Materials

Year 2 : electives

Non-Destructive Testing of Materials has been removed and was replaced by **Experimental techniques for characterizations of construction materials**

Master Electrical Engineering

2nd Master

Option 1

Semiconductor Technologies and Integrated Devices has been removed. Students who still need to take this course must now enroll for high-frequency Electronics and Antennas. Did you already pass for Semiconductor Technologies and Integrated Devices? This course will be transferred to your program later on this academic year.

- **Nano and Opto-electronic Devices** has been removed Students who still need to take this course must now enroll for Nano-Electronic Devices and Technologies. Did you already pass

[for Nano and Opto-electronic Devices? This course will be transferred to your program later on this academic year](#)

[Option 3](#)

- **Identification of Dynamical Systems** is now 5 credits (used to be 4 credits). [Did you pass for the 4 credit course? Then it will be transferred to your program later on this academic year.](#)

[Are the new courses not visible in the self-service or do you have any other questions regarding your study path? Please contact \[studypath.engineering@vub.be\]\(mailto:studypath.engineering@vub.be\) .](#)

Master Architectural Engineering

2nd Master

[Electives](#)

Urban and Construction Law was added to the elective list
