

## **Programme Changes 2025-2026**

### **Master in Communication Studies: Digital Media in Europe**

**Important: For students enrolled in the programme in 2024–2025 or earlier**

In the academic year 2025–2026, the course **Critical Issues in Digital Economics**, currently part of the compulsory electives, will not be offered.

As a result, **the compulsory electives module will now consist of two courses instead of three:**

- **Theories on Media, Technology and Society**
- **European Platform Policies**

If you were enrolled in Critical Issues in Digital Economics in 2024–2025 but did not pass the course, after the resit examination period, you will need to select one of the two remaining courses to complete the module.
